Summary

As a self-employed full stack developer, I have been creating responsive and adaptive web applications that consider usability and accessibility of web standards for more than eight years. I have extensive experience in building complex backends using Ruby/Rails, as well as frontend interfaces using HTML, CSS, and JavaScript. I am proficient in frontend frameworks such as React and Vue.js, and I have a strong knowledge of web optimization, testing, and debugging techniques.

I am passionate about utilizing the most recent and most effective tools, frameworks, and libraries, and following the best practices in web development. I have a will to always adapt, learn, and use my gained knowledge in practice, whether solo or in a team. I have successfully completed multiple projects for various clients, using technologies and skills such as Python, ES6+, NPM, Yarn, Gulp, Grunt, Sass, Scss, Less, HamI, Pug, Wordpress, PHP, Linux, Vim, VSCode, Git, Docker, and more. I am always open to new challenges and opportunities to grow as a developer.

Reach out to me at korotayev.dmitriy@gmail.com.

Experience

Full Stack Developer

Freelance

Apr 2020 - Present (4 years)

- Implementation and testing of responsive and adaptive web applications that consider usability and accessibility of web standards
- Generating and maintaining your code in accordance with the coding standard and best practices
- Optimizing web applications and database queries for maximum speed and scalability
- Building reusable code and frontend libraries for future use
- Building complex backends using Ruby/Rails, with further deployment
- Routinely testing websites for ease of use, speed and other quality factors using several device types
- Ensuring unit and integration tests with maximum coverage
- Writing effective, scalable code and architecture
- Project planning and evaluation

Frontend Developer

ZELT

Sep 2018 - Aug 2020 (2 years)

Developed responsive user interfaces using HTML, CSS, and JavaScript. Collaborated with UI/UX designers to translate mockups into visually appealing interfaces. Built interactive web components with frameworks like React and Vue.js. Optimized code for performance and cross-browser compatibility. Conducted thorough testing and debugging. Proficient in Git and experienced in agile methodologies. Strong problem-solving skills and ability to work in cross-functional teams. Relevant experience in frontend development with a focus on creating exceptional user experiences.

ZELT (ceased in 2020): ZELT was a peer-to-peer logistics platform that connected individuals and businesses with transportation services for shipping goods. It aimed to make shipping more convenient and cost-effective. However, ZELT discontinued its services in 2020 due to challenges in scaling the business.

Frontend Developer

Infogr.am

Jul 2016 - Aug 2018 (2 years 2 months)

Leveraged expertise in HTML, CSS, and JavaScript to create immersive and user-centric web experiences. Collaborated with designers and backend developers to implement visually appealing and functional user interfaces. Utilized frontend frameworks such as React and Angular to build interactive components and streamline development processes. Proficient in responsive web design and cross-browser compatibility to ensure seamless user experiences across different devices. Experienced in version control systems like Git for efficient code management. Strong problem-solving skills and attention to detail in debugging and optimizing frontend code. Effective communication and teamwork skills in a collaborative development environment. Passionate about staying updated with the latest frontend trends and technologies to drive continuous improvement.

Infogr.am (ceased in 2018): Infogr.am was a data visualization platform that allowed users to create and share interactive infographics, charts, and maps. It was founded in 2012 and gained popularity for its easy-to-use interface. However, it discontinued its services in 2018 and its team joined Prezi.

Senior Frontend Developer

4finance

2015 - 2016 (1 year)

- Conception, planning and implementation of frontend systems with common and latest web technologies
- Implementation of web interfaces for installment loan products with React/Redux, ES6+ & Scss, as well as testing of the implementations
- Supporting the UX team with your technical expertise and knowledge of methods
- Driving an agile development process with your team members
- Providing support for junior and mid-level frontend developers with Ruby/Rails, as well as technologies mentioned
- Working side by side with some of the most passionate and talented people in the industry, on site or abroad

Full-stack Developer

TrueVision

2014 - 2015 (1 year)

- Building and maintaining small-to-middle-scale web application backends with Ruby/Rails
- Working on ambitious projects using the best technologies and standards
- Investigating, debugging, and delivering fixes promptly, for critical production incidents
- Improvement and extension of the existing projects' backend or frontend
- Close collaboration with PMs, designers, and backend developers from several different teams
- Design, maintenance and improvement of internal tools and services
- Preparing technical documentation for a future work process

- Designing technical solutions for new functionalities, as well as maintaining the existing ones

Web Developer

FE International, Inc.

2011 - 2012 (1 year)

- Developing new frontend & backend features of internal brokerage system for using PHP & jQuery
- Writing clear, well-tested, and performant code using a Yii2 framework
- Prioritizing tasks and managing time for implementations
- Reporting to the Lead Project Manager and Developers
- Assure that all user input is validated and serialized before submitting to back-end
- Researching on the latest technologies to meet future business needs

Education

Self-education

Professional Hobbyist, Progressive Development

2008 - Present

Via:

- Listening to podcasts for developers and freelancers
- Watching RSS feeds for updates and best practices
- Using Codeschool interactive courses and Lynda.com videos
- Reading books on more specific topics
- Practicing on personal projects

Rīgas Tehniskā universitāte (Riga Technical University)

Bachelor's Degree, Informational Engineering

2012 - 2014

Wanted to try myself out in something that is partially what I already knew and also what I'd like to learn.

Got many useful acquaintances and learned a bit of advanced math.

Dropped out when it got boring and more of a problem with picky teachers than a useful learning source
